

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification as follows:

Please amend the paragraph beginning on page 3, line 18 as follows:

A data communication apparatus according to the present invention includes an enclosure, a mobile phone function unit arranged within said enclosure, a loop coil antenna arranged so that at least a portion of a conductor extends along lateral surfaces, which are surfaces forming said enclosure with the exclusion of both major surfaces of the enclosure, ~~the lateral surface of the enclosure~~, and a semiconductor integrated circuit connected to ~~the~~ said loop coil antenna, ~~the~~ said semiconductor integrated circuit ~~having~~ carrying out non-contact data communication over ~~the~~ said loop coil antenna with an exterior communication device ~~by using~~ with use of electromagnetic induction, and having the function of a non-contact IC card and/or a reader/writer function.
